I am a 5th year Ph.D. student at Université Libre de Bruxelles, supervised by Professor Alessandro Parente and co-supervised by Professor James C. Sutherland. Previously, I was a research student at the von Karman Institute, supervised by Professor Miguel A. Mendez.

In my research, I work on development of reduced-order models for turbulent reactive flows. I am passionate about science outreach, creating educational content, academic writing and developing scientific software.

Education

- Sep 2018 – Mar 2023 (**expected**), Ph.D. student, Université Libre de Bruxelles, Brussels, Belgium
 - Jan 2020 – Apr 2020, research stay at the University of Utah, Salt Lake City, UT, USA

Dissertation: *Reduced-order modeling of turbulent reacting flows using data-driven approaches.*
- Jul 2016 – Sep 2016, Research student, the von Karman Institute for Fluid Dynamics, Rhode-Saint-Genèse, Belgium
Report: *POD and DMD decomposition of numerical and experimental data.*
- Mar 2015 – Sep 2016, Master degree in Civil Engineering, Cracow University of Technology, Cracow, Poland
Thesis: *Quasi-static model of wind action in flutter of bridge structures.*
- Oct 2010 – Feb 2014, Bachelor degree in Civil Engineering, Cracow University of Technology, Cracow, Poland
Thesis: *Analysis of wind action on a support structure of a dual-rotor wind turbine.* Graduated with honors.

Work experience

- Feb 2017 – Aug 2018, Software test engineer, Nokia, Cracow, Poland
 - Automating regression tests in Elixir language and manual black-box tests of base station software in the Long Term Evolution (LTE) standard, Python scripting, tutoring team members, writing *know-how* documentation, setup works of telecom laboratory equipment.
- May 2014 – Dec 2014, Civil structures intern, BMT Fluid Mechanics, Teddington, United Kingdom
 - Taking part in all stages of commercial wind tunnel tests of high-rise buildings and offshore structures. This included determining cladding pressures, forces and moments on structures, assessing pedestrian wind comfort, assisting in wind environment workshops with the clients, drawing 3D CAD models and communicating with the modeling team.

Academic awards & grants

- 2023, 39th ISOC Distinguished Paper Award for Numerical Combustion
- 2023, Student Travel Award for the SIAM Conference on Computational Science and Engineering
- 2022, Student Travel Award for the SIAM Conference on Mathematics of Data Science
- 2020, Funding for an abroad research stay, CCCI, Université Libre de Bruxelles
- 2019, F.R.S.-FNRS Aspirant Research Fellow grant & grant renewal in 2021
- 2018, Scholarship for the first year of my PhD, Université Libre de Bruxelles
- 2016, Funding for an abroad research stay, Erasmus+
- 2016, Dean's scholarship for the best students, Cracow University of Technology
- 2012, GE Foundation Scholar Leaders scholarship

Contributions to teaching & science outreach

- 2022, Contributing to the course *Data-driven engineering*, Université Libre de Bruxelles
 - Preparing and delivering exercise sessions for students using Jupyter notebooks
 - Delivering a seminar talk on my research at the end of the semester

`</>` <https://github.com/burn-research/data-driven-engineering-course>
- 2021, Developing Python software for a graduate course on multicomponent mass transfer
- 2019, Teaching *Fluid mechanics and transport phenomena* class, Université Libre de Bruxelles
- 2018–present, Developing open-source educational materials
<https://kamilazdybal.github.io>
- 2018–present, Co-organizing annual *Pinguino Lecture Series* for fellow PhD students and academics
- 2016–2017, Leading *Arduino Study Group*, Jagiellonian University
- 2016, One of my educational articles is published in *Neutrino*, a popular science magazine issued by the Physics Department at the Jagiellonian University
 <http://www.neutrino.if.uj.edu.pl/archiwum/2016/33>
- 2013–2015, Developing online materials in STEM for high school students as part of the GE Foundation Scholar Leaders voluntary experience
<https://wszechswiatnauki.wordpress.com>

Software development

- **multiply** – an educational Python library for multicomponent mass transfer
`</>` <https://multiply-lib.readthedocs.io>
- **PCAfold** – a Python software package for generating, analyzing and improving low-dimensional manifolds
`</>` <https://pcafold.readthedocs.io>
- **reduced-order-modelling** – a collection of MATLAB® tools for data pre-processing, reduced-order modeling and results visualization
`</>` <https://github.com/burn-research/reduced-order-modelling>
- **plotting** – a collection of MATLAB® functions for automating plotting scientific results in our research group
`</>` <https://github.com/burn-research/plotting>
- **POD-DMD-GUI** – a MATLAB® GUI for POD and DMD decomposition of experimental or numerical data
`</>` <https://github.com/kamilazdybal/POD-DMD-decompositions>
